Leighton McCarthy, K.C., a
Toronto lawyer and financier,
said in a speech delivered in Cal-
gary that the Wheat Pool was
Canada's largest commercial un-
dertaking, and remarked that
western farmer's appear to be
realizing the advantages of close
organization.

LOCAL ITEMS

Leonard Bayley is a week end
visitor to Calgary.

Mrs. J. E. Thompson returned
to town this week.

Mrs. F. Sayers is in the Cereal
hospital for medical treatment.

H. R. King purchased a Gra-
ham Bros. Truck on Monday.

Mr. and Mrs. Hurley and two
daughters were week end visitors
to Calgary.

Cooley Bros. expect to move
into their new garage about the
15th of the month.

Mrs. A. Aitken is spending the
week on the home farm with her
brother Mr. Murray.

Miss Stewart of California who
has been visiting with her brothers
here left for her home on
Wednesday.

Mr. Lawrence Jones moved
from the Bank housekeeping
rooms to the house owned by
Mrs. Fred Otto.

Dr. Arthur Lensgraf of Dray-
ton, Ohio, and his brother Dr.
Flmer Lensgraf have been with
their parents for a few weeks.

Mr. and Mrs. C. Elery of Port-
land, Ore. have been spending a
few weeks at the home of the
latter's brother Mr. Walter An-
derson.

Wm. Short who formerly lived
north of Chinook and is now
living at Blackie had the misfor-
tune to have his house destroyed
by fire this week.

The picture show and dance
were a great success on Friday of
last week. A large crowd at-
tended the dance as the floor
was somewhat crowded.

The Ladies Card Club gave a
farewell party at the home of
Mrs. W. Lee in honor of Mrs. B.
Dobson last on the eve of her
departure for Calgary.

H. Howton has completed
painting the buildings of the Im-
perial Lumber Co and is now
painting the house belonging to
company which is occupied by
Mr. Rennie.

Mr. and Mrs. Steckle and Mrs.
E. E. Jacques motored to Cal-
gary on Friday and returned on
Sunday. Mrs. Jacques spent the
week end with her parents.

Mr. and Mrs. Railton and
daughter who have been visiting
at the home of the former's sister
Mrs. Rennie, for the past month,
left for Saskatoon last week.

The Card Club met at the
home of Mrs. J. C. Carter on
Tuesday evening, the prize win-
ner being Mrs. Rennie. The
prize was a china cake plate set
in silver.

Mrs. Arthur Moore of Edmon-
ton spent a few days this week at
the home of her brother Mr. C.E.
Neff. Mr. and Mrs. Edwin Neff
and baby, of Hanna, were also
visitors for a few days.

A Shadow Social and Dance
will be held in the Lughlin School
on Friday, October 5th, under
the auspices of the Echo Club.
Ladies' Shadow will be sold to
the highest bidder. Lunch pro-
vided, special music.

Mr. and Mrs. H. T. Lensgraf
left on Thursday morning with
their two sons for Pana, Ill.,
where they will visit relatives for
a short time before going to
Texas where they intend spend-
ing the winter months.

WARNING AGAINST COMBINE

To those farmers of Saskatch-
ewan who are pinning their faith
to the new combine harvester and
thrasher, a word of warning is
given by Prof E. A. Hardy, M.
S. A. of the agricultural engineer-
ing branch of the University of
Saskatchewan, when addressing
the delegates attending the
twelfth annual meeting of the
Dominion Mortgage and Invest-
ment Association.

Prof. Hardy discounted the
idea that the combine method
was a panacea for the farmers'
labor trouble and general oper-
ation costs.

The farmer who wanted to be
successful, he said, with the com-
bine system would have to work
out the seeding, harvesting and
marketing of his crop so that
each operation would prepare for
and harmonize with the other.

"To harvest your crop with the
combine," he said in effect, "you
must cultivate, drill, seed and
generally work for the combine,
otherwise you will be in trouble."

Wheat Pool Notes

By the end of the present year
the total number of Alberta Pool
elevators will be 307, or an ad-
dition of 147 houses during the
year.

British Columbia wheat grow-
ers are joining the Alberta Wheat
Pool. They find it much to their
advantage to do so.

wheat or an average for 27 work-
ing days during this period of
143 contracts and 16,445 acres
per day. Since the issuing of
the Second Series contract 10-
934 new members have been
added to the association.

Deliveries to Alberta Pool el-
evators reached a high water
mark on September 24th when
over one million bushels of grain
were reported.

During the month of August,
1923 a total of 3,831 contracts
were received in head office.
This number of contracts involv-
ed a total of 473,704 acres of

WHOOPIING COUGH

Whooping Cough is very dan-
gerous to children and sometimes
fatal to grown-ups, more die from
it than Scarlet Fever.

The mother whose children
have had whooping does not need
to be reminded of its symptoms.
She can remember her child run-
ning to her gasping for breath,
caching hold of her skirt for
support and finally breaking into
that painful rasping cough
Whooping cough starts with a
slight cold, running at the nose,
fever, and a dry cough. The
eyes are blood-shot. After a
week the cough gets worse and
the child coughs many times in
succession. He becomes pale
and draws in his breath with a
sharp scraping sound. This is
the whoop. In some cases this
is not always present.

If a child shows the first signs
of whooping cough get a doctor
and follow his directions absolute-
ly.

The child frequently vomits
because of hard coughing. As a
result many children lose weight
and become weak. In this con-
dition they easily get T. B.,
pneumonia or other serious con-
ditions. Do not give the child
heavy foods. Give those easily

digested. Milk and egg are very
good. Give an egg well beaten
in milk every time he
loses a meal.

All discharge that comes from
the mouth and nose while the
child is sick should be received
in a piece of old linen rag and
burned. It is through careles-
ness in this that the disease is
spread. Keep separate cups,
glasses plates and spoons for the
child while he is sick. See that
the child gets plenty of fresh air.
Keep the room well aired night
and day. Unless it is raining
take him out every day in the

yard or in the park.
Keep the child away from oth-
ers, even after the whoop has
stopped he can give the disease
to others. Wait until the doctor
says he is well. Remember that
whooping cough is very catching.
Be sure that your child does
not spread disease and death to
others.

Don't forget the Mass Meeting
to be held tonight at 8.30 in the
School Auditorium. The special
business is to consider the erec-
tion of the Agricultural Hall or
otherwise. All are requested to
attend this meeting.
W. A. Todd, Secretary.

Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many decades of the past, has been inclined to regard the scientist as hopelessly impracticable, a dreamer, a faddist. Within more recent years marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great universities of the world, and to Governments must be credited in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free wrote: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources; yet the surprising fact is not only that these resources are unexploited, but that only a small fraction of them have been put to work. Not the truth of the facts that scientists know are being used. The rest of them lie idle in the hands of professors or in the unread pages of scientific books."

Som years ago a gentleman named Dudley became a chief chemist of one of the large American railways. He devised methods of testing coal and coke and lubricating oils, and saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He suited the available water supplies to the engines, and saved millions of boiler tubes from being burnt out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railways have saved more money than all the railroad wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potash industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, but if they piled it up anywhere the rain always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash—that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potash industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist built an electric apparatus which collects these poisonous particles out of the smaller smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches, in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the wealth of the whole irrigated region.

In Saskatchewan a clay-working industry was having trouble with its raw products. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations, and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust in wheat and other parasites, the removal of moisture from wheat without impairing its milling and baking qualities—these and other important subjects are receiving the attention of the scientists of Canada, and their solution will mean hundreds of millions of dollars to the farmers of the Dominion.

All of which only goes to demonstrate that every industrial interest in Canada, whether it be in the manufacturing class or in the work of production from the farm, the mine, the forest or the fishes, should strongly support the present move for larger and more extensive research work in this Dominion. And of all classes, the farmer will probably prove to be the greatest gainer.

Alberta Crop Yield

It is estimated that the crop yield for the southern portion of Alberta will amount to 40,000,000 bushels. It has been estimated that the total yield for Alberta will be in the neighborhood of 200,000,000 bushels, but some officials say that 180,000,000 bushels will be the extent of the yield.

Little did our grandparents think the day would ever come when the steering wheel would be the family circle.

Shampoo Yourself With Cuticura Soap

Anoint the scalp, especially spots of dandruff and itching, if any, with Cuticura Ointment. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A healthy scalp usually means good hair.

Sample each free by mail. Address: Canadian Agents, The Cuticura Soap Co., Montreal, P.Q. Price, Soap 25c. Ointment 50c. and 100c. Cuticura Shaving Stick 25c.

New Match Company

The Columbia Match Company of Canada has taken out a Dominion charter with the purpose of acquiring control of the Columbia Match Company of Cleveland and of erecting and operating a plant in Montreal.

Bing: "What! You and your wife never quarrel?"

Wing: "Well, we haven't quarrelled for three weeks."

Bing: "How's that?"

Wing: "We're not on speaking terms."

Honor For Lost Flyers

Monument On French Coast Dedicated To Memory Of Nungesser and Coll

A monument honoring the memory of Captain Charles Nungesser and Captain Francois Coll has been dedicated at Etretat, where the French airmen left the coast of France on their ill-fated attempt to fly to New York more than sixteen months ago. It bears the inscription:

"To the First Who Dared."
At the base of the column, which resembles an obelisk, are marble figures, three times life size, representing the two flyers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coll in their plane "White Bird" passed on May 8, 1927, before they disappeared in the west. On the front are engraved the words: "Nungesser and Coll, May, 1927." The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who take a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.Y., says:—"With a feeling of gratitude I write to tell you that Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got out of my boxes of medicine there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I feel so much better, my nervous person will be benefited by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Serve One Customer

Paris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently.

Si Moulay Hemada, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour, in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

"I wonder if that old fat girl is trying to flirt with me?"
"I don't know, but I can easily find out by asking her—she's my wife."

The Man With Asthma, almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Death Of Sir Horace Darwin
Sir Horace Darwin, son of Charles R. Darwin, who wrote the "Origin of Species," died recently at Cambridge, Eng. Sir Horace, who was himself noted as a scientist, had been in failing health for some time. He had invented and constructed many delicate seismological and aeronautical instruments.

Minard's Liniment—Popular for 50 years.

W. N. U. 1763

Transform Cadillac

For Railway Service

Canadian Pacific Uses High Power Sedan For Inspection Work

A high power Cadillac sedan specially equipped with flanged steel tired wheels has just been issued from the Angus shops of the Canadian Pacific Railway at Montreal for the use of the Engineering Department of the company. Capable of travelling on the rails at as great a speed as upon the road, the machine will be used for inspection trips on C.P.R. lines throughout the country.

Service conditions are harder on the tracks for braking, and there are three systems on the car; the ordinary foot brake operating on the rear wheels, the conventional emergency brake, and a special supplementary brake applied by turning the steering wheel, acting through brake-shoes on the front wheels. The axels have been changed, the front axel being rigid and more rugged, and the rear axel, instead of being mounted in conjunction with the differential, has had the differential removed and replaced by a one-piece alloy steel axle. This is driven by a single gear with a ratio of 4 to 1, in place of the ordinary differential ratio of 4 and ten eighths to 1.

The wheels themselves are of special design and are equipped with rubber insulation between the steel tyre and the wheel centre in order to lessen shock at rail joints, switch points, diamonds and crossovers. The lighting system, moreover, has been supplemented to comply with railroad regulations.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improved in other parts of Canada.

Drawback To Ocean Service

Airplanes Forced To Take Fuel For Entire Trip

Sir Eric Geddes, chairman of Imperial Airways, Ltd., states a scheme to establish an air service between England and India is now being organized, and it is hoped that within 18 months machines will be taking passengers from England to Karachi in five or six days.

On the subject of trans-Atlantic flight Sir Eric said an ocean service was not now commercially possible for whereas on the projected Empire service the machines could be re-fueled at intervals, the trans-Atlantic flyer had to take all the necessary fuel with him.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without in the house. It is truly a household medicine and as its use is so common, it is not surprising that it is one of the most ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Entertained War Veterans

Belgium Honors Badly Wounded British Soldiers

Forty disabled British ex-soldiers were recently the guests of the British Disabled Soldiers' Association, Antwerp, who asked the British Legion to select a party of the most badly wounded men in Britain for a ten days' tour in Belgium as an indication of Belgium's admiration for, and gratitude to, the British Army.

The whole of Belgium's official life was represented in this feting of British heroes, who were selected by the Legion irrespective of social standing or rank. Some were so badly disabled that the War Office had sent with the party a detachment of the R.A.M.C. to attend to them on the journey. Practically all the men had lost limbs.

Schwartz: "Vare iss you working now?"

Krause: "I'm working in der zink mine."

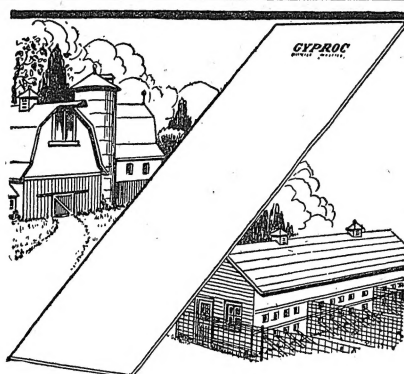

Schwartz: "Der zinc mine?"

Krause: "Chess. Press one button and you come up—press another button and you zinc!"

We reckon if a kid could choose his own mother it wouldn't take him long to make the choice between one who could bake cookies and one who always knew what kind of food to make when she had two five-cent anti-salts.

An anti-aircraft shell, thought to be live, was unearthed by workmen excavating the roadway at Queen's Gate, Kensington Gardens, in London.

Headache? Relieve with Minard's Liniment.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabaster.

SEND FOR FREE BOOK

Canada Gypsum and Alabaster Limited, Winnipeg, Canada

Please send handsome free booklet, "Walls that Reflect Good Judgment," which contains valuable information on Gyproc for farm use.

Name _____

Address _____

GYPROC Advantages for Farm Buildings

Easy to use.

Low cost.

Workable as lumber.

Cannot warp, bulge, crack, shrink or burn.

Takes any decoration.

Resists heat and cold.

Vermitt proof.

Eliminates repairs.

Protects your stock.

Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings.

Especially suitable for converting attics and basements into extra rooms.

"EMPIRE"

GYPROC Fireproof Wallboard

Radio May Control Street Cars

Radio experts prophesied a day when street cars and aeroplanes would be operated by distant radio control, following a demonstration at Chicago in which a surface car was operated by wireless from an automobile.

Ballplayer: "We gave the umpire fifty bucks to let us win the game."

Friend: "And still you lost?"

Player: "Yeah; the umpire was crooked."

A geographical mile is the length of one minute of latitude.

Humane Society Awards

The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Brooksby, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterton Lakes, Alberta. Parchment certificates, Howard Mayers, White Rock, B.C.; Mary and Victoria Barrowman, Kaslo, B.C.; and W. H. Hepher, Powell, B.C.

Happiness and misery are the names of two extremes, the utmost bounds whereof we know not.

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer Manufacture, to assure the public against imitations, the Tablets will be stamped with the "Bayer Cross" trademark.

PROVINCES WILL CLAIM RIGHTS TO WATER POWER

Ottawa.—Dominion and provincial rights to water powers will be argued in the supreme court of Canada next week. Recognized as one of the most important questions with far-reaching ramifications which has come before the courts in years the matter undoubtedly will be carried to the Privy Council in England for final adjudication.

Development of the potential water powers of the St. Lawrence, International and Interprovincial in character, development of water power on the Ottawa river and a number of other power projects, all these are vitally concerned in the points to be decided respecting Federal and provincial jurisdiction. The case probably will extend over two weeks.

The Dominion government and at least five of the provinces, Ontario, Quebec, Manitoba, Saskatchewan and British Columbia, will be represented.

Ontario and Quebec, through counsel, will take the leading part in opposition and will be supported by British Columbia, Manitoba and Saskatchewan probably also will be heard in argument in answer to the claim of the Dominion.

These provinces, broadly speaking, will contend that the water powers were vested in the provinces before confederation and were not transferred to Dominion Domain by virtue of the British North America Act. A further argument would put forward on behalf of the provinces that the Dominion has no right to these water powers and that any treaty respecting an international waterway must subordinate to the British North America Act.

Saskatchewan has its own legal representative at Ottawa who has already received instructions to appear at the Supreme Court hearing and watch Saskatchewan's interests.

Withdrawing From League Of Nations

Argentine Parliament Is Discontinuing Appropriations To Meet Dues Geneva.—Argentina intends to withdraw from the League of Nations, it was indicated by advices from Buenos Aires stating that the Argentine parliament had decided to discontinue appropriations to meet league dues.

The news caused surprise and consternation in league circles. It was pointed out that the Argentine decision is tantamount to withdrawal as no nation may remain a member of the league unless the financial obligations are met. Under the rules of the league any member nation that contemplates withdrawal must pay dues for two years after notification of withdrawal is given.

Canada Helps Storm Victims Ottawa.—Hon. Ernest Lapointe, acting prime minister, announces that the government of Canada is subscribing the sum of \$25,000 to the British West Indies hurricane relief committee. Mr. Lapointe stated that the step was taken after consultation with and upon the recommendation of the Canadian Red Cross.

May Appeal To Privy Council Ottawa.—Permission to carry their appeal to the Privy Council in England will probably be granted to the Proprietary Articles Trade Association, founded by the department of labor to be an association in restraint of trade. The matter, it is stated, is now before the department of justice.

Chinese Soldiers Face Starvation Shanghai, China.—Generals of the Nationalist army notified Nanking headquarters that 100,000 soldiers are in danger of starving to death in the Chinghi vicinity. The message also said the villagers were suffering from lack of food and soldiers were not provided with boots or blankets.

Fighting In China Peking.—More than 2,000 Chihli Shantung soldiers have been killed opposing the Nationalists northeast of Tien Tsin, says the Kuein news service, reporting the surrender of the former Northern army.

Air Mail Service Starts Toronto.—Daily air mail service between Montreal and Toronto, and an international service between Montreal and Albany, N.Y., started October 1.

W. N. U. 1753

Does Not Need Warships

South Africa Protected By British Fleet, Says General Smuts

Capetown, South Africa.—Speaking to an audience which was predominantly of Dutch origin, General Jan Christian Smuts, leader of the opposition in the assembly, was vigorously applauded in a memorable speech on the secession question.

General Smuts at one point declared: "If we were not within the empire we would have to go to America or France, or some other big country to protect us because we are not safe. One warship could bring us to our knees. But today we are not considered in a kral. We are in a friendly circle with a powerful British fleet to help us if any injustice is planned toward us."

"We need not spend millions on a fleet," General Smuts continued, "but can concentrate on projects of development so necessary to a young country. The British Empire is not a bond tying us, but she is a helping hand."

Cement Firms Protest

Producers Will Contest Move For Removal Of Duty

Ottawa.—Contesting the application of the Canadian Council of Agriculture for removal of the import duty on cement, representatives of the cement producers in Canada continued the survey of facts relating to the industry before the tariff advisory board.

In the brief of the Canadian Council of Agriculture, which was filed recently, it was claimed that the prosperous condition of the industry did not justify continuance of the existing import duties. In opening the case for the producers generally, Professor J. Jackson, Toronto, categorically denied the claims of the applicants. He sought to prove that the cost of production did not leave 57.5 per cent. of the sales to provide overhead and profits, as maintained in the brief of the council of agriculture.

Will Make Second Attempt Next Year

American Pilot Stranded On Flight To Stockholm Via Greenland

Copenhagen.—Bert Hassell, American flyer, who arrived here from Greenland with his trans-Atlantic companion, Parker Cramer, announced he would make another attempt next year to fly from the U.S. to Stockholm by way of Greenland. Hassell and Cramer, who were rescued in Greenland after having been stranded in the Arctic wastes, arrived at Copenhagen aboard the steamer Fulton.

They were accompanied by Prof. William H. Hobbs, leader of the University of Michigan Greenland expedition, which had brought them to safety.

Canada Will Be Represented

Ottawa.—Canada will be represented at the International Air Conference, which takes place in Washington in December. This was stated officially at the Department of National Defence. Canada's representative has not yet been selected but an announcement with respect to the selection will be made later. The conference has to do with civil aviation.

Zeppelin To Start October 10

London.—Germany's new trans-Atlantic dirigible, Count Zeppelin, will start its first flight to America not later than October 10, says an Exchange Telegraph despatch from Berlin. The generally favorable weather predicted for the North Atlantic during the first two weeks of October makes a start at that time almost certain, the despatch said.

B.C. Cabinet Unopposed

Vancouver.—The nine portfolio holding members of the British Columbia cabinet, headed by Hon. Dr. S. P. Tolmie, premier and minister of railways, were re-elected to the provincial legislature when they were unopposed at nomination proceedings. Voting was to have taken place on October 4, if there had been contests.

Swedish Government Resigns

Stockholm.—The government of Premier Ekman, leader of the central bloc, resigned as an outcome of the recent election in which the government party lost several seats, including that of Foreign Minister Loeffgren.

Mayor Of Cardston Dead

Lethbridge.—Mayor Mark Spencer, Cardston, pioneer and eight times chief magistrate of that town, died recently at Rochester, Minn.

Will Analyze Frosted Wheat

Scientists At University of Saskatchewan Have Started Work

Saskatoon, Sask.—Now that four Canadian scientific laboratories, including that of the University of Saskatchewan, have determined that milling and baking qualities are not lessened by toughening or dampening of grain, scientists here, in collaboration with the investigations carried on elsewhere in Canada, are turning their attention chiefly to frosted wheat.

With painstaking effort as to detail, the Saskatchewan University laboratory, under general supervision of Dr. T. Thorvaldsen, professor of chemistry, and direct supervision of Dr. R. K. Larimer, has begun work with the object of determining the actual damage done by frost to the milling and baking quality of wheat.

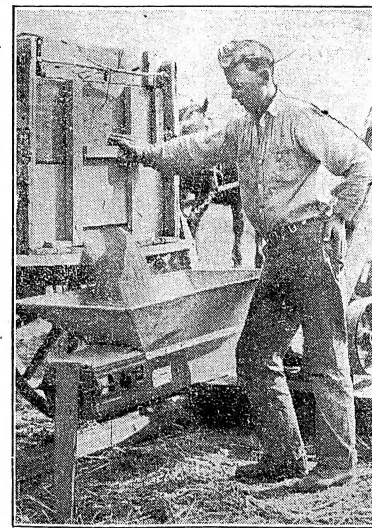

FEDERAL AID FOR HIGHWAYS SHOULD CONTINUE

Regina.—That federal aid for highways should be continued with additional aid to the various provinces was the view of the delegates attending the 15th annual convention of the Canadian Good Roads Association who dealt with many other matters of interest during the sessions here. Elimination of level crossings, building cement bridges and roads, the financial responsibilities of urban municipalities in road development, gasoline taxes and winter roads all had their place on the agenda.

Hon. O. L. McPherson, minister of public works for Alberta, was unanimously chosen president of the association and other officers were elected. Seven invitations were presented for next year's meeting place and, while, no decision was arrived at Prince Edward Island would seem to be in favor with the delegates.

When the subject of Federal aid for highways was under review the discussions arising from this topic were crystallized in the following resolution:

"Resolved, that in view of the very marked and acknowledged benefit which comes to Canada as a whole because of the large investments being made in the highway construction and maintenance by various municipal and provincial bodies, such benefit being of a far reaching nature and affecting many branches of Dominion government service; and whereas the Federal government has collected in excess of \$200,000,000 during the past 10 years which can be directly or indirectly traced to highways; and in view of the fact that the Federal government recognized its interest in highways by a first grant of \$20,000,000, which has been expended; and, in view of the increase in highway travel throughout Canada, this association, in annual convention assembled, reaffirm its oft-stated belief in Federal aid to highways and that additional aid should be granted at the earliest possible moment to the various provinces and the executive committee is hereby instructed to make every reasonable effort to have this resolution made effective."

E. Philpott, British harvester from Liverpool, England, at work in a farming field of Vulcan, Alta.

Director Of Cancer Research

Dr. Ellice McDonald, shown above, who believes that he can forestall cancer by treating the subject through the administration of thyroid gland extract and other means. Dr. McDonald is director of cancer research at the University of Pennsylvania and the Philadelphia General Hospital. Dr. McDonald is a Canadian who had his early education at Winnipeg and finished it in Toronto. He has three brothers, Brig.-Gen. H. F. McDonald, C.M.G., D.S.O., of Winnipeg; Dr. H. McDonald, M.P.P., of Qu'Appelle, Sask., and F. A. McDonald, Winnipeg.

Attending University Of British Columbia

Percy Williams Will Take Freshman's Course In Vancouver

Vancouver.—Percy Williams, Olympic 100 and 200 metre champion, will attend the University of British Columbia here for one year. After that he will take the business administration course at the University of Washington. This was decided at a meeting of members of the committee in charge of Williams' affairs here, which Williams attended. Williams spent two days in Seattle and returned home in order to discuss all angles of his situation with his friends here. He had been invited to attend the Washington institution.

"He is remaining in Vancouver for the year because he feels that it would be unfair to those who welcomed him so wonderfully and who have been so good to him to leave," a member of the committee said.

Expresses Sympathy For Florida Sufferers

King George Cables Condolences To President Coolidge

London.—That King George takes a keen interest in world affairs is evidenced by the cable sent by him to President Coolidge, expressing his sympathy to the people of the U.S. for the sufferers in the Florida hurricane.

The message read: "I desire to express to you and through you to kind intermediaries to the American people, my sincere condolences upon the disaster which has recently overwhelmed Porto Rico, the Virgin Islands and the state of Florida as a result of the recent hurricane and my sympathy with all those that have suffered from its effects."

Anglo-French Naval Pact

United States Government Rejects Agreement In Note Sent To Both Powers

Washington, Sept. 26.—An unqualified rejection of the so-called secret Anglo-French naval accord as a basis for renewed discussions on naval arms limitations is understood to be contained in the United States replies to Great Britain and France which were forwarded to Paris and London.

A separate note for each government was sent the American embassies for transmittal to the foreign offices.

It had been expected one note would be sent to both governments. Although it was learned the notes are not identical in form they are understood to be similar to each other in their essential facts.

It is understood both notes comprise a lengthy discussion of the American stand on naval disarmaments with respect to cruisers and submarines. This subject has been the centre of disagreement between the United States and Great Britain and is held to have caused the failure of the 1927 Geneva conference.

As indicated at the White House it is expected the notes will reiterate the United States stand on naval disarmaments as outlined at the 1927 Geneva conference.

Entertaining Premier King

Entire British Cabinet Invited To Dinner At Savoy Hotel

London.—Premier Stanley Baldwin and the whole cabinet have been invited to the dinner to be tendered to Premier Mackenzie King of Canada by the Canada Club on October 10. This will be Mr. King's only speaking engagement in England. He will spend only one week in England and during that time is in hopes of getting about to see the country. Hon. P. C. Larkin, Canadian High Commissioner, will preside at the dinner, which will be held at the Savoy hotel.

Forty Killed By Explosion

Powder Magazine In Old Spanish Fort Cased Accident

Melilla, Morocco.—By an explosion of the powder magazine of the ancient Spanish fort of Cahorizajas Bajas forty persons were killed and 200 injured, some of them probably fatally. The explosion demolished the old citadel, on a rocky hill overlooking the town. All houses around the citadel were destroyed.

Women and children were among the dead and injured. Nine soldiers of the Spanish garrison at the fort were killed. The government appropriated 25,000 pesetas (\$4,125) for relief of the families of victims.

CAMPAIGN IS ON FOR ELECTIONS IN GREAT BRITAIN

Yarmouth, Eng.—The first open move in a nation-wide campaign for the forthcoming British general election, when Prime Minister Stanley Baldwin and his government appeal to the British voters for another five-year mandate, will be made here when 2,600 Conservative delegates, a recent gathering of its kind, go into conference to hammer out a party platform.

Within a month from now Conservatives, Liberals and Labor, by means of their annual conferences will determine the issues upon which they will wage the biggest party struggle in this country since the "Great War."

The most intense fights are expected on tariff questions, the extension of protective measures by means of "safeguarding" of industries by special import duties. British political strategists are getting ready to adopt new means and methods of appealing to the public.

Close watch is kept on the rapid development of wireless and talking movies. "Talkies" are being made of Baldwin and other political leaders; motor cars and trucks with the latest broadcasting apparatus made ready for swift campaigns through the country districts. The hunt for party songs is on, and again the Conservatives are in the lead with song sheets already issued.

One ditty delicately alludes to the "flapper" vote, that uncertain bloc of five million newly-enfranchised young women for whom all parties are angling, all claiming flapper support, and none too certain of it.

MAKING EVERY EFFORT TO BRING BRITISHERS HERE

Winnipeg.—That there was no foundation for the charge made by Bishop Lloyd of Saskatchewan at a luncheon here "that there has been and is today a deliberate attempt to keep the British out of Canada," was the declaration made by Hon. Robert Forke, minister of immigration. Speaking over the long distance telephone from his farm at Pipestone, Man., Mr. Forke said: "We are doing every thing possible to bring to Canada Britishers whom we think are willing and capable of working on Canadian farms, no matter what district they come from."

"We are paying, with the help of the British Government and the railways, their passage to their Canadian destination; we are giving them this money so that their start will not be surrounded with so many difficulties encountered by the earlier pioneers and those who today are coming in from non-British countries."

"We are associating ourselves with every good organization, having the British people's best interest at heart, to advance the settlement of British in Canada and we are doing nothing for members of any other nationality who are coming into Canada."

"What else should we do or can we do in all practical commonsense that we are not now doing?"

Manitoba Resources

Mr. Justice Turgeon Appointed Chairman Of Commission To Deal With Question

Ottawa, Ont.—Mr. Justice Turgeon, of Saskatchewan, who was appointed chairman of the commission appointed to inquire into and decide upon the various matters in connection with the return to Manitoba of her natural resources, is in the capital arranging for the organization of the commission.

Mr. Justice Turgeon's colleagues on the commission are C. M. Bowman, of London, Ont., and Hon. T. A. Cramer, of Winnipeg. A secretary to the commission will be appointed in a few days, said Mr. Turgeon, and thereupon an organization meeting will be held, probably in Ottawa.

Gate Receipts Cover Expenses

Montreal.—Quite contrary to all expectations and customs, the Olympic games at Amsterdam paid for themselves this year. This was learned in an announcement made by the Netherlands consulate here. Official figures are lacking, but it is understood that gate receipts will pay for all monies advanced the Dutch Olympic committee by the government and individual subscription.

Decline In Unemployment

Stockholm.—Unemployment is on a steady decline in Sweden. Latest government figures, just released, show that the number of people out of work who applied for aid in July was 9,500 as compared to 11,169 in June, or a decrease of about 14.9 per cent.

Support For Gov. Smith

New York.—Representative Mary T. Morton, Democrat, New Jersey, in an address broadcast from here, appealed to women to vote for Governor Smith, whom she termed "the greatest humanitarian this country has ever produced."

Rain Damages Ontario Crops

Sault Ste. Marie, Ont.—Heavy rains and continued cold weather are alarming farmers of this district. Scores of acres of grain are said to be rotting in the fields, and potatoes planted on low ground are being ruined by excessive moisture.

Exhibit Of Canadian Fruit

Winnipeg, Man.—Choice Canadian fruit for English exhibition and display passed through Montreal on the way to Manchester and London, being conveyed with special precautions by the Canadian National Express Company.

Enters Novel Plot

Detroit.—A plot that he was waiting in his sleep when he shot and killed his wife, Amelia, has been entered as a defense for Chester Kutzub, 48, on trial here charged with murder.

France is the only European country whose present birth-rate shows an improvement on the pre-war figure.

West Adapted For Honey Industry

Bees Are Free From Disease and Not Harmed By Cold

Beekeeping in Saskatchewan is fast becoming more than a side line. By the end of this year, there will be 50 per cent. more beekeepers than there were last year. Roy M. Pugh, official in the field crops branch of the provincial department of agriculture, is authority for the statement. He has returned from a six weeks tour which took him south to the border and as far north as Nipewin, where there are many colonies of thriving bees.

Last year there were 928 beekeepers. There are 1,140 now registered. By the end of the year there will be 1,300 at least, he says. Honey last year sold around 14 cents a pound, although prices varied in different localities and with outside production. There were at least three beekeepers in the province who produced last year in excess of 1,500 pounds of honey. They did it as a side line. One man, resident in rural Saskatchewan, is about to produce honey on a commercial scale as a means of livelihood.

At the present time, the average is five or six swarms of bees per beekeeper in the province although many operators have in excess of 100. Statistics show that those who had a few swarms a year ago are increasing the number greatly.

All of which shows bees are useful for other than their sting. This year the field crops branch showed Saskatchewan honey at the exhibition, bottled in various sizes. As an expert it obtained the permission of the Saskatchewan Beekeepers' Association, who put on the exhibit, to distribute the honey through stores and restaurants in Regina. The way the honey has since disappeared has made the beekeepers' association wish it had more bottled up to distribute.

Wheat 40 Bushels To Acre

Good Yields Of Wheat Are Reported In Saskatchewan Area

Among the first wheat shipments this year from the Saskatchewan district were those from two farmers at Hughton, each of whom recently hauled 10,000 bushels to one of the large elevators at Saskatoon. This wheat, graded No. 1 Northern and was harvested from fields that averaged 40 bushels to the acre.

Another farmer from northwest of Saskatoon trucked several thousand bushels to the elevators here, all of which was given the top grade. The Canadian Government elevators are receiving their first wheat from the Saskatchewan district. Two farmers, whose farms are near the elevator, hauled wheat to it from fields that yielded an average of 35 to 40 bushels to the acre.

Bumper Apple Crop

This Year's Crop Estimated To Be Largest Since 1923

The commercial apple crop of Canada this year is estimated at 3,157,360 barrels, the largest in any year since 1923. The increase is in British Columbia where the crop is some 37 per cent. bigger than in 1927. The crop is smaller in Nova Scotia by 4 per cent., New Brunswick 20 per cent., Quebec 2.2 per cent., and Ontario 1.3 per cent.

According to the Canadian Government Bureau of Statistics the 1923-27 average crop is 3,165,845 barrels, which places the 1927 crop 15,515 barrels above the five year average.

The points acreage of 551,200 acres indicates a two per cent. increase over 1927.

Lady (engaging servant): "And do you have to be called in the morning?"

Applicant: "I don't have to be, mum, unless you happen to want me!"

"Are you the man who boxed my ears yesterday?"
"No."
"You are not?"
"No."
"Then who are you?"
"The man who is going to box your ears today."—Duen Humor, Madrid.

W. N. U. 1762

WORKING ON CORRECT HISTORY OF GREAT WAR

Clemenceau Will Probably Leave The Best Record For Future Generations

The histories of the Great War and the unprinted legends of the conflict are "all wrong" and the principal French actors in the four years' drama of the western front are writing their versions of events for posterity.

One outstanding character in the struggle is living in a little fisherman's hut in Vendee. He prefers not to be molested and spends most of his time walking in the garden or looking in his study scratching away with his pen. Surrounded by his books and his memories, "The Father of Victory" is touching up his account of the war and Georges Clemenceau probably will leave the greatest record for future generations.

In another retreat—this time in Brittany—Marshal Foch is poring over scraps of writing paper, his war maps and notes. In time, he will start writing and from the rugged coast near Morlaix will come the impressions and the revelations of the Allied commander.

Marshall Joffre has just concluded his life story which was written at his pretty country home above the Seine at Louveciennes. Embittered by ten years of criticism and angered by the efforts of many war authors to shift the responsibility for the French retreat in early days of the war, to his shoulders, Joffre may publish parts of his memoirs.

"So many errors have been printed in histories of the war," he said. "The published stories of the first battle of the Marne are nothing less than fiction, and many other phases of the war have been erroneously recorded by historians."

"I wrote the story of my part in the war as carefully as I could, destroying untruths with truths and using facts to replace fiction. I have documents to prove everything I asserted. I hesitate to publish my memoirs because there is no use in starting a controversy. But I may be obliged to publish chapters, now and again, just to put historians right."

Gallieni, hero of the Oureq, who sent the Prussian fleet out to stem the enemy tide on the heights of Meaux, died before his memoirs were well started. He could have told much about the feat of turning a retreating army in its tracks to whip the over-confident foe.

Eskimos Are Polite

Never Punish Their Children, As Wheels and a province that does not believe that They Are Reincarnated Ancestors

The Eskimos of Greenland never punish their children, because they believe them to be reincarnated ancestors. An Eskimo's son may be his dead uncle, or a cousin, or even his father, re-born in a new shape. They are never scolded, let alone spanked. Furthermore, the Eskimos are the most polite people in the world.

William Thalitzer, of the Royal Danish Academy of Science, who spent many years in Greenland studying the lives of the Arctic dwellers, so told the International Congress of Americanists meeting in its twenty-third biennial convention at the American Museum of Natural History.

"The Eskimos are so close together," he explained, "that they have developed an elaborate amity of address in order to eliminate frictions among themselves."

Why He Was Remarkable

"William," asked the teacher, "can you tell me who George Washington was?"

"Yes, ma'am, he was an American general."

"Quite right; and can you tell me who George Washington was remarkable for?"

"Yes, ma'am. He was remarkable because he was an American and told the truth."

Household Science Degree Course
Details of a four-year degree course leading to the degree of Bachelor of Household Science have been announced by the University of Saskatchewan. Instructions in household science has been provided for some time, but this will be the first year that a degree course has been on the curriculum.

More than 400 persons have died during the past month in Athens from dengue fever. Total cases exceed 250,000. In other Greek towns and cities there are hundreds dead.

"What kind of a party was it?"
"Well, at about 1.30 the automatic fire sprinkler started to work."

Meal Mixtures For Steers

Screenings and Oil Cake Proved To Be Most Satisfactory

An experiment conducted at the Lennoxville Experiment Station, shows that a mixture of 60 per cent. screenings and 40 per cent. oil cake makes one of the most satisfactory meal mixtures for steer feeding. Four lots of steers were used, six to a lot. Those fed screenings made an average daily gain of 1.86 pounds; the second lot given 60 per cent. screenings and 40 per cent. corn, gained 1.84 pounds per day; 60 per cent. screenings and 40 per cent. cottonseed produced a gain of 1.99 pounds; and the screenings and oil cake a gain of 2.12 pounds per day.

The gain produced with the cottonseed was lowest in cost at 7.1 cents per pound of gain, and the corn the highest 7.79 cents per pound of gain. The screenings and oil cake cost 7.27 cents, but when the finish of the steers is taken into consideration which is estimated at half a cent a pound over the other lots, the results showed that this mixture makes one of the most satisfactory mixtures for steer feeding. Full details of this experiment are recorded in the report of the Lennoxville Experiment Station which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

It is interesting to note that the steers in this experiment each consumed 1,740 pounds of hay, and 5,220 pounds of ensilage.

Napoleon's House Is Interesting Museum

Has Been Officially Recognized As An Historical Monument

The Napoleon's Museum, which is latest of France's historical monuments to get official recognition, has been inaugurated by Edouard Herriot, minister of public instruction, at the Ile d'Aix in the house occupied by the emperor immediately preceding his exile to St. Helena.

The house had been purchased and restored by Baron Gourgard, great-grandson of the general who accompanied Napoleon into exile. The baron founded the Society for the Preservation of Historical Relics.

The house contains the last bed in France which the emperor slept in, and the authentic draft of the famous letter written to the English prince regent in which Napoleon threw himself upon the mercy of his conquerors.

The newspaper, the Paris Midi, comments, how the harsh treatment that Napoleon received then from England differs from the exile in Holland imposed on the former Kaiser.

No Use For It

Old MacTavish was not a mean man. No; he just knew the value of money.

"Say, doctor, hoo's beezness wi' ye the no?"

"Oh, fair, fair."

"I s'pose ye've a deal o' prescribin' tae dae fer coolds an' sair throats?"

"Ah."

"An' what dae ye gin'rally gie fer a sair throat?"

"Naethin, I dianna want a sair throat."

An effort is being made to establish an airport at Banff. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

Registration of a trade-mark in Mexico confers the exclusive right to its use by the registrant.

Profits In Poultry

Barred Plymouth Rock Pullets Lay 305 Eggs In 305 Days

Excellent work with poultry has been done on the Experimental Station at Lennoxville, Quebec. A year ago a Barred Plymouth Rock pullet laid 305 eggs in 305 days, and the report of the superintendent of the farm contains further particulars of this pullet officially known as C.H. 188.

The eggs laid by this bird had a market value of \$12.82, and the cost of feeding her was \$2.35, leaving a profit over cost of feed of \$10.47. She was hatched on May 1st, and laid her first egg December 5. As a pullet commencing to lay she weighed 5.5 pounds. Her best laying period was an egg a day for 33 days. During the cold months of January, February, and March, she missed laying on eleven days.

Another test reported was with 125 Barred Rock pullets housed in the permanent straw loft type of laying houses. These pullets commenced to lay November 1st and in the year produced 13,456 eggs which at market prices sold for \$854.98. Feed consumed was valued at \$316.26 or an average of \$2.53 per bird. The average production brought a revenue of \$6.67 per bird, giving a profit of \$4.14 per bird over cost of feed.

During the four winter months, November, December, January, and February, the cost of feed for a pullet has worked out at 77.20 cents. The prevailing market price for eggs during that period averages 66 cents per dozen, so that it requires 14 eggs during these months to cover the feed bill.

Cheese and Its Uses

Cheese Is Listed As An Important Article Of Diet

The first cheese factory in Canada was started in Oxford County, Ont., in 1864, followed by the second in Missisquoi, Quebec in 1865. Since that time cheese factories have increased in number and less and less cheese has been made on the farms. The art of cheese making was first introduced by the earliest French settlers.

Cheese is an important article of diet, and the choice of variety is wide as there are some 250 different kinds. These are not all available in Canada, but there are sufficient to give the housewife a chance to satisfy the tastes of the family.

Pamphlet No. 7, new series on "Why and How To Use Cheese," will help the housewife to provide a variety of cheese dishes, as it contains about forty recipes in which cheese is used. The pamphlet will be mailed on application to the Publication Branch, Department of Agriculture, Ottawa.

Nearly all the protein of milk is retained in cheese. Whole milk cheese also contains the vitamins indispensable to growth and mental development. For older boys and girls and adults, cheese is one of the best muscle builders and one which is entitled to a larger place in our menus.

Power Installation Growing

During the year 1927 the hydraulic installation of Canada was increased by 221,655 horse-power actually placed in operation while other construction progressed to the point where an additional 550,000 horse-power will be in place by the end of 1928, by which time over five million horse-power will be installed.

Counsel: "Was the plaintiff expensively garbed?"
Witness: "She was indeed. 'Er garage must 'ave cost a small fortune."

Discover Monument

Of Unknown Race

Beautiful Stone Pyramid Has Been Unearthed In Central America

An unknown race which preceded the Mayas built a beautiful stone pyramid some 2,000 years ago in a city of what is now north Guatemala. Scientists of the Carnegie Institution of Washington described the puzzling monument to the International Congress of Americanists meeting in New York.

The pyramid, 85 feet square at the base and 25 feet high, was ascended by four stairways, one on each side, and colossal masks of stone on each side guarded the holy place of the prehistoric priests from the ungodly, representing fearsome faces of men and serpents.

The top was flat and undoubtedly was used as a place of sacrifice. The pyramid was covered with a glittering white stucco.

Time passed, and for some unknown reason, the pyramid was completely buried under trees and rubble, doubling the size of the mound. Archaeologists found the larger mound, and around it evidence that it was used—at about the opening of the Christian era—as a huge sundial, from which the priests observed and determined the equinox and solstices of the sun.

Digging into the larger pyramid, located at Uxatsum, the lesser, more beautiful pyramid was discovered, and it has just been uncovered and explored this year.

Lending color to the theory that the pyramid was for sacrifices, a headless skeleton of a woman of about 25 years was found buried under the flat surface of the top.

The architecture does not correspond to any Mayan architecture known, and is believed to be that of a race which preceded the Mayas, possibly the race from which the known Mayas descended.

An Agricultural Expert

Young Man From Holland Will Pursue Studies In Farm Methods

Peter Keyser, B.Sc., a young Hollander, who arrived in Canada in 1924, with no knowledge of the English language and went on a farm at St. Albert, near Edmonton, and then in 1926 entered the Old School of Agriculture, from which he recently graduated, now proposes continuing his studies at the University of Alberta, or else at Guelph, with a view to winning the degree in agriculture. He considers that the combination of good lands and good, free education in Alberta should make an irresistible appeal to his countrymen.

Planes Aid Prospectors

The mining industry in Manitoba is using airplanes on a bigger scale than ever before, both for transportation over distances of several hundred miles, where there are no railways, and for tracing from the geological structures and formations. In territories adjacent to bodies of water they have been used to follow the line of ore bodies, some of which have been plainly visible across beds of more shallow lakes.

U.S. Farmers For Canada

A party of thirty landseekers from Kansas and Nebraska, passing through Winnipeg recently, reported purchases of about 8,000 acres of farm lands at a cost of about \$160,000. L. B. Boyd, in charge of the group, expressed the belief that every man in the party would settle in Canada and bring his family. The party was much struck by the quality and appearance of the grain crops.

Says Britain Going Dry

Sunday Express Gives Figures To Prove Its Assertion

The Sunday Express recently proclaimed in the headlines on its front page that "Britain is rapidly going dry."

The consumption of liquor in England during the last fiscal year was less than a third of that consumed at the beginning of the century according to figures just issued.

The 1900 consumption of spirits in England was 32,229,522 gallons as compared with 10,412,921 gallons last year. Before the war there were 2,000,000 total abstainers where now there are 10,000,000. The annual per capita drink bill has dropped to \$33 from \$90.

"These figures reveal the radical improvement in our social habits," says the Express. "Drunkenness is now a rare spectacle in towns and villages. This great social revolution is due partly to education, partly to the motor car, partly to sports and partly to the increase in healthy amusements."

Drying Damp Wheat

Grain Can Be Dried Without Injury To Milling Or Baking Qualities

A two years' investigation of the problems connecting with the drying of tough and damp wheat by the associate committee on grain research of the national research council has resulted in the announcement that grain can be dried without injury to its milling and baking qualities.

Experiments carried on by the research council, the Universities of Alberta, Saskatchewan and Manitoba and the Dominion grain research laboratory at Winnipeg, were compared and showed a gratifying uniformity.

The investigation was conducted to settle the question as to the effect of heat drying on the milling and baking qualities of the wheat, the experiment being made through a drier so constructed as to give absolute control over all conditions of drying.

The committee agreed that 180 degrees F. is the maximum safe temperature for the drying air where it enters the grain.

With regard to the storage of grain experimental results show that sound grain stored during the winter in a damp condition undergoes no deterioration. The applicability of these results to elevator storage has not been investigated.

Charged by the Dominion Government with the investigation of protein as a grade factor, two varieties were tested with the result that Parker's Marquis and Hard Federation were found to be inferior in baking and milling quality to Marquis.

Harness Wind For Electric Power

Electricity Generated By Winds Now Affords Cheap Power For Western Homes

Electricity, generated by the winds which blow over that prairie of Western Canada, is being used to furnish current for electric lights, washing machines, electric irons, and other labor saving devices in the farm homes of the country.

Wind power has, of course, been used in many countries for generations, but it has had this disadvantage of being irregular in its application. By using the power of wind to generate electricity which is stored in electric batteries inventors have overcome this difficulty. Electricity can be generated with a ten-mile wind and stored until required. The batteries will furnish power during a period of calm lasting as much as ten days.

Electricity is already very widely used in Canada, most of it being generated by water-power. The harnessing of the winds now affords cheap electric power for prairie homes. The only cost is the initial one; and after machinery is installed nature does the rest.

No Particular Hurry

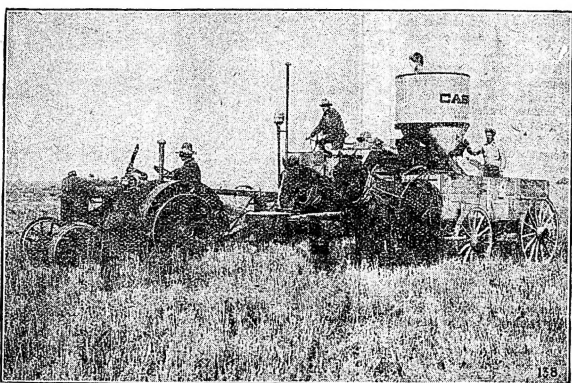

The Scotchman had fallen into the well and, while swimming around in it, called to his wife. She came running to him and asked: "Shall I call the servants from the field, that they may pull you out?"

"What time is it?" inquired he. "Eleven-thirty," said his wife. "Well, never mind," said he. "I'll swim around until dinner time."

King George Economical

Styles in yachting clothes may change from year to year for ordinary mortals, but they don't change for King George of England. He recently confided to a friend that he had worn the same yachting cap for the past 11 years, and the same white flannel trousers for the past 10.

Reaper-Thresher Gathers Grain

The mechanization of farm operations in Western Canada is here instanced. A reaper-thresher at work in Western Canada. The boy unloading grain into the wagon is E. Philpott, of Liverpool, England, one of the army of harvesters which came to Canada to help gather the Dominion's record crop.

Diamond Jubilee Committee Issues Official Commemorative Medal of Beautiful Design

One of the final tasks of the National Diamond Jubilee Committee, which arranged the celebration last year of the Sixtieth Anniversary of Confederation, has been the preparation of an official commemorative medal. The records of 1867 showed that the government of Sir John A. Macdonald issued a medal commemorating the confederation of the provinces. This medal, which was designed and struck in England, showed on the obverse the effigy of Queen Victoria and on the reverse a group of five figures symbolizing the founding by Britain to the four original provinces of the pact of confederation. In designing a medal commemorating the Diamond Jubilee, the National Committee decided to show on the obverse an effigy of His Majesty King George V. and on the reverse a single figure which would in some measure represent the spirit of unity and strength which has been developed in Canada during

the last sixty years. A number of mitee in working out its idea and a Canadian artists assisted the design of Mr. C. W. Jeffreys of Toronto was finally adopted as expressing most accurately the views of the committee. The general idea conveyed by this design was afterwards translated in his own original way into medallion art by the eminent sculptor and engraver, Mr. Raymond Delamarre, of Paris, France.

Illustrations of the medal reproduced herewith show a new effigy of His Majesty King George V., which is the work of one of the foremost British artists, Sir Bertie Mackenzie. The reverse shows a figure which admirably typifies the qualities of youth, energy and confidence in the future. By its position, facing the Atlantic, from which blows a strong invigorating breeze, there is a suggestion of the cultural origins of our people and of the ideals of liberty and justice inherited from overseas. The figure stands on a pedestal bearing the dates 1867-1927. Surrounding the pedestal are sheaves of wheat and wreaths of maple leaves and in the background a map of Canada, in the upper part of which the shield from the Canadian coat-of-arms appears. On the Atlantic side of the map are the names of the first discoverers, Cartier and Champlain, and on the Pacific side

those of Cook and Vancouver. The whole is surmounted with the Latin motto from the Canadian coat-of-arms, "A mari usque ad mare."

The National Committee is happy to acknowledge the splendid co-operation of the London and Paris mints in the production of the original dies of this medal. The dies arrived in Canada early in August and the work of striking the medal is proceeding at the Royal Mint in Ottawa. The medal is three inches in diameter—one of the largest ever handled by the Ottawa Mint. All the metal used is from Canadian mines and the medal is thus a happy combination of British, French and Canadian artistic and technical effort.

The committee has ordered gold medals to be struck for His Majesty the King, for His Excellency the Governor-General of Canada and for the Prime Minister of Canada. Gold medals will also be presented to

H.R.H. the Prince of Wales and to the Rt. Hon. Stanley Baldwin, Prime Minister of Great Britain, who paid a special visit to Canada in connection with the Jubilee ceremonies last year. A gold medal will also be presented to the Dominion Archives. Silver medals will be struck for His Excellency the Viscountess Willingdon and for H.R.H. the Prince George, who accompanied the Prince of Wales on his visit last year, for members of the Privy Council of Canada, the Lieutenant-Governors of the provinces and the Prime Ministers of the provinces. Bronze medals will be presented to senators and members of the House of Commons, to members of the provincial governments, to the surviving sons and daughters of the Fathers of Confederation, to members of the National Diamond Jubilee Committee and to officers of the Provincial Diamond Jubilee Committees. The medals are being struck as rapidly as possible at the Royal Mint and it is hoped that the distribution will be completed before the end of the present year.

The Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, took advantage of his trip to Europe in connection with the signing of the Kellogg treaty to present gold medals to His Majesty the King, H.R.H. the Prince of Wales and the Rt. Hon. Stanley Baldwin.

Manitoba Fisheries

Organization Meeting Held To Place Industry On A Firm Footing

At a meeting of the Manitoba Co-operative Fisheries Limited, attended by more than 100 representative fishermen from Lakes Winnipeg, Manitoba and Winnipegosis, plans were completed to place the industry on a basis where the fishermen will share to a greater extent in profits made in the business. Suggestions were made to appoint agents at Chicago and New York. Last year Manitoba produced 18,000,000 pounds of fish and those who belonged to the organization were responsible for a catch of about 7,000,000 pounds.

Among the curious regimental pets belonging to units of the British Army at different times have been a chimpanzee, an ape, a lion, a seal, a cheetah, a black bear, and a lamb.

"I read your remarkable article. In fact, I read it three times." "You flatter me!" "Not at all. Even now I don't understand it."—Felix Mele, Paris.

W. N. U. 1753

Distinguished Farmers

What Pool Includes Amongst its Members a Prince, Baron, Duke and Countess

The Alberta Wheat Pool now includes among its members a prince, a baron, a duke and a countess. They have between them a signed-up acreage of 10,000 acres, it was stated at the offices of the pool in Calgary.

These distinguished members are His Royal Highness, the Prince of Wales, Baron Rodney, the Duke of Sutherland, and the Countess de Foras. The latter, who has a farm at High River, has just signed up a contract for 350 acres with the pool.

Human Power Plant

Psychologists Claim To Have Heard Messages From Nerves In Body

Human life has been revealed as a wonderful electric power plant and system of transmission lines.

Two experimenters in psychology say they have listened to messages flashed over the network of nerves in the human body, translating the impulses of nerve currents into sound waves that human ears can hear. Impulses are detected by electrodes attached to the body. These nerve messages, magnified eight hundred times by a powerful amplifier, can be broadcast by wireless.

Valley Of A Thousand Falls

The name, Valley of a Thousand Falls, in the Mount Robson District, British Columbia, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman and participated in his attempt to climb Mount Robson.

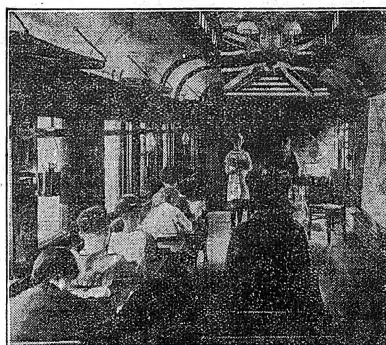

Another Classroom on Wheels Appears

Education in these days is hard put to it to keep pace with civilization although the one is dependent upon the other. In the more remote districts of Canada, in particular, the cause of culture has a struggle to survive, and were it not for modern methods the rising generation in many parts would remain untalented.

Although agricultural communities enjoy the most modern educational facilities and the "little red school house" has assumed an increased importance and has considerably en-

Co-operating with the Ontario Department of Education, the Canadian Pacific Railway has evolved the school car, and late this summer issued from its Angus Shops the second especially prepared coach for this unique purpose. It is now operating in the district in Ontario lying to the west of Fort William and Fort Arthur, while its predecessor is carrying on its duties as it has for some time past in Northern Ontario in the neighborhood of Carleton Place.

The school car is equipped in every

larged its scope, other districts suffer by necessity from neglect. Outlying areas with a scattered population find inter-communication at best in summer time under the most favorable conditions difficult enough, but when winter closes down a partial paralysis is brought about. Such localities could not afford school facilities nor could permanent schools adequately serve the community, for during the winter season children could not travel with safety. This problem, which for a number of years remained unsolved, has been met at last by a singularly practical and effective remedy, the "school car."

way like the most up-to-date "little red schoolhouse," having a bright classroom with blackboard, regulation desks, maps, globe, school-books and so forth; a library of books for the students and adult visitors as well; and comfortable living quarters for the teacher. From the outside its appearance is that of a standard first class coach, but inside it has been entirely remodelled and specially protected and equipped to withstand the rigors of the coldest weather when left on a lonely siding.

The mobile schoolhouse solves in a unique fashion a vital and hitherto unsolvable educational problem.

Permanent Link With World

Residents of Pitcairn Island To Receive Radio Transmitting Set

Isolated since birth, except when some friendly or storm-buffed vessel chose to visit them, the islanders of the small Pitcairn Islands will soon be able to talk with the world, for a Marconi wireless transmitter which has been presented to the islanders by the Marconi International Marine Communication Company, is now on its way out there and, when installed, will be a permanent link with the outside world.

Pitcairn Island lies in the mid-eastern Pacific Ocean, and was sighted by many sailing ships in the old days. Unlike the majority of islands in this region it is without coral reefs, but rises abruptly with steep and rugged cliffs of basaltic lava.

Recently a small group of islanders learned the Morse Code, picking it up from books that had been given to them by the Marconi operators on the ships that called at the island. In 1921 they obtained a simple crystal set and five years later received a Marconi type 31 ship's crystal receiving set, but on each they can only receive.

British Settlers For B.C.

Block System Of Settlement Is Advocated By Premier

Premier S. F. Tolmie informed the Empire Parliamentary Association delegates and members of the Vancouver board of trade that the provincial government was prepared at any time to enter into negotiations for the placing of British born settlers on British Columbia lands.

"British Columbia was prepared to supply the land, administration, supervision, schools, roads, and her investment in railways," Hon. Dr. Tolmie stated.

The block system of settlement was advocated by the premier and he believed preliminary training could be given settlers in clearing settlement lands.

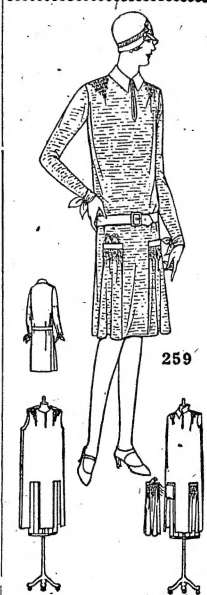

During the conference the feasibility of settlers going on the land in the Peace River district was discussed, but the settlement scheme embraced various sections of British Columbia.

Brandon's Broadcasting Station

Brandon's first broadcasting station has just gone into daily use, and a studio will give grain and stock reports each day, and once a week, in the evening, will broadcast local concert programmes.

The main supply of rubber comes from hevea trees of the tropics.

Mining Possibilities of Northern Manitoba and Saskatchewan Attracting Great Attention

Parisian Simplicity

A slender one-piece dress achieves distinction through shirring, which gives a slightly fitting appearance at shoulders, and forms pockets at each side of front of skirt and adds flare to hemline. It is a youthful type that is becoming to most figures, and so entirely wearable and smart in realized cashmere. Wool jersey, plain or printed, silk crepe, crepe satin, cotton crepe, georgette crepe and sheer velvet, also adaptable. Style No. 259 is designed in sizes 16, 18 and 20 years, 36, 38, 40 and 42 inches bust. Pattern price 25 cents in stamps of coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McTernan Ave., Winnipeg

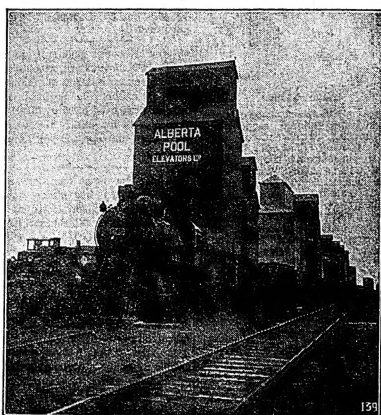

Pattern No. Size

Name

Town

Policeman: "As soon as I saw you come round the bend I said to myself, 'Forty-five at least!'" Lady Driver: "How dare you! It's this hat that ages me."

Nine in a Line

The distinction of being the point in the British Empire from which the largest number of bushels of grain are shipped direct from farm to rolling stock belongs to Vulcan, Alberta, on the lines of the Canadian Pacific Railway. Here is a view of the local elevators, nine all told, seven of which are of double capacity. Last year Vulcan shipped two and a quarter million bushels of grain, and indications are that it will exceed its own record this year.

The year 1928 will undoubtedly be a record one in the history of Canadian mining. The search for mineral deposits has been unequalled both for its intensiveness and for its breadth of activity. Never in any one year has so much money been spent in exploration as will have been spent this year. The operations are Dominion-wide but by far the most important are those that are directed to areas underlain by the Precambrian rocks of the northern parts of the provinces of Quebec, Ontario, Manitoba, and Saskatchewan, and of the Northwest Territories.

The most spectacular explorations are those that are headed into the more remote parts of the country east and west of Hudson Bay. When it was learned last winter that transportation to Flin Flon was to be provided, that that large ore-body was finally to be exploited, and that other large ore-bodies in northern Manitoba had been discovered, the Department of Mines, at Ottawa, was flooded with requests for information regarding that part of the country.

Then interest broadened and the possibilities of more remote areas were considered. It was felt that the completion of the Hudson Bay Railway to Churchill and the increase of boat transportation on the bay would render accessible a great stretch of country that had hitherto been regarded as Canada's hinterland. Then came the desire to be on the ground early and secure the best. The result is that a great many prospecting parties have left for these northern areas. The exploratory work is entrusted to hardy men of experience and knowledge. Some prospectors have gone to Hudson Bay by way of northern Ontario and northern Manitoba, others have left by boat from points on the Atlantic coast. One company alone has sent by boat ten parties of two men each and other necessary supplies. These will be assisted and directed by men sent in by aeroplanes.

In the more readily accessible areas and in areas where transportation facilities are of the best, search for more mineral deposits is being prosecuted with feverish intensity. This takes the form of surface prospecting and of underground testing by diamond drilling, shaft sinking, and drifting. All this exploratory work has been given a powerful impetus by the discoveries centering on the northern part of the Manitoba-Saskatchewan boundary, the Rouyn area of western Quebec, and the Sudbury, Patricia, and other areas of Ontario, and it is expected that by the close of the year a very important addition will be made to the known and developed mineral reserves of the country.

To Study Ancient Designs

The National Museum, Ottawa, will conduct a study of the ancient handicrafts and designs of French Canada, in order to determine the extent of their influence on the arts and crafts of the various Indian tribes. It is thought that many, if not most of the patterns in bead and silk work that appear on Indian specimens may not be aboriginal at all but copied from European patterns.

Tourists Aid Development

The tourist is often the force-runner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

That young Canadian sprinter from the West coast astonished the world. To beat the West in anything a fellow has to be speedy.

"The drunken driver must go," says a newspaper heading. That's just the trouble. He always does go.

Young Lady: "Your novel has a charming ending."

"What do you think of the opening chapters?"

"I have not got to them yet." — Lustige Kolner Zeitung, Cologne.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

WORLD HAPPENINGS BRIEFLY TOLD

Old Age Pension legislation for Ontario is not likely to be enacted next year, but will be one of the government's main planks in its coming election campaign.

Baron Von Huenfeldt, German filer, who stopped over at Constantinople on his flight from Germany to San Francisco, revealed that Germany is planning an air line to China.

A fitting ceremony marked the unveiling of a granite cross at the Aux Coudres, Quebec, commemorating the first mass ever said in Canada, by Jacques Cartier, on September 6, 1535.

General Umberto Nobile has announced he would go into seclusion at the home of a friend in Naples soon to write the complete story of his recent Polar expedition.

An all-Canadian telephone service, Winnipeg to Montreal, has been established via Port Arthur and Fort William, a distance of 1,600 miles. Heretofore, a connection between these points has been made through the United States.

The Department of National Defence, Ottawa, has placed an order with the British firm of Armstrong-Whitworth for five Siskin fighting planes to cost \$130,000. This will bring the government fighting planes to thirteen.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes: "I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Automatic Gear Shifting

New Device Developed In England To Solve Motor 'Troubles'

The London Daily Mail says that a "motoring development of first rate importance" in the form of an automatic gear-shifting device has been adopted by one of the leading British manufacturers after successful tests over 50,000 miles.

By this device a driver moves a pointer on a quadrant on his steering wheel to the desired speed designation, steps on a pedal, and the gear changes automatically, smoothly and silently.

"Well, Folly, how do you like your new teacher?"

"I half like her and I half don't like her. But I think I half don't like her."

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and every next unit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spots any more, and my nerves are much better. I feel like a new woman. Lydia E. Pinkham's medicine has helped me wonderfully."

In saying Lydia E. Pinkham's medicine has helped me wonderfully. —Mrs. Wm. H. BECHTOLD, Box 143, Port Colborne, Ont.

W. N. O. 1758

WILL FILL IMPORTANT ROLE

Britain's First High Commissioner To Canada Should Be Helpful To Both Governments

Sir William Clark, who has arrived in Canada to serve as Britain's first High Commissioner to this country, will fill a very important role and one that gives promise of being valuable to both countries concerned. As Sir William himself has declared, he will serve as an additional channel of communication between the Ottawa and London governments, "two governments," he adds, "having equally the same king and governing nations within one and the same Empire."

Britain's High Commissioner to this country should be able to offer important advice to the British Government on a number of matters that will inevitably arise. There is, for instance, the question of immigration. The question of British immigration into this country is perhaps the most important one so far as the two governments are concerned. The new British High Commissioner, who is a trained observer of all economic questions, should be helpful in solving this difficulty. He will be in a position to advise the British Government as to Canada's powers of absorption, as to just what type of immigrant this country requires; indeed he should be in a position to advise with accuracy, and with a full knowledge of all aspects of the situation, both the British and Canadian Governments on this important question. In fact, it is just possible that this new link between the two countries which has been created is just what is necessary to render a problem no longer a problem.

On other matters, too, Britain's High Commissioner to Canada should be of distinct service. Sir William Clark gives promise of being an ideal man for the post and Canada will welcome him heartily to her shores.

An Interesting Collection

Figureheads Of Old Warships Can Be Seen In England

At Castle's Yard, Millbank, England, is preserved the most complete collection of figureheads of old wooden warships—some of them dating back to Nelson's time—extant in England today.

Here may be seen figureheads from the Hood, Cressy, Bristol, Collingwood, and many other famous ships, carved out of timber and painted and gilded by men who were artists in their craft.

One very fine example is the Highlander that once belonged to H.M.S. Edinburgh. Another is a gigantic head of the Duke of Wellington, measuring nearly four feet from forehead to chin. The ship which this adorned was launched on the day the Iron Duke died. Another interesting exhibit came from the Fighting Temeraire, Turner's famous picture of which hangs in the Tate Gallery near by.

NEW BEAUTY FOR YOUR CLOTHES By Miss Martin

You can look attractive and stylish on less. Learn how to give beauty and variety to your dresses and add individuality and charm to things around the home by the quick magic of tinting and dyeing. Perfect results are possible only with Diamond Dyes. Each package represents the perfection of 50 years of dye-making. They never streak, spot or run. They are real dyes, like those used when the cloths were made. Diamond Dyes are easy to use. The "know-how" is in the dyes. Fashionable tinting and dyeing right over the out-of-style or faded colors. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Miss Martin, Diamond Dyes, Windsor, Ontario.

British Columbia Apples

Will Be Marketed In New Way From Coast To Coast

British Columbia apples are now going to be marketed in an up-to-date way from coast to coast in all the large cities of Canada, it is announced by W. McL. Cooper, general manager of the Eden Apple Service, a subsidiary of the Associated Growers of the Okanagan, following meetings with Victoria and Vancouver wholesalers. Under the new plan British Columbia apple service stations will be established in all the chief cities where apples will be kept cool and in best condition. British Columbia apples will be distributed from these stations in a new style, half dozen and dozen cartons for the serious buyer. All selling will be done through retailers, who will be supplied daily.

Seed Cleaning Station

New Government Station At Saskatoon To Be Ready For 1929 Crop

Dr. J. H. Grisdale, Deputy Minister of Agriculture at Ottawa, following a visit to Saskatoon, stated that it was the intention of the Federal Government to establish shortly at the latter city a seed cleaning station similar to that operated at Moose Jaw, and that he hoped the new station would be operating in time for the farmers to take advantage of it for the 1929 crops.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Our National Buffalo Herd

Buffalo National Park, with its area of 197.5 square miles, is the home of Canada's national buffalo herd, there being a little over 5,000 of these animals now in the park. Moose, elk, mule deer, antelope and yak are also in the park.

Among the arms, munitions, etc., which Germany has either handed over to the Allies or destroyed are 14,000 aeroplanes, 315 submarines, 83 torpedo boats, 6,000 machine guns, small arms and 107,000 machine guns.

Blentfast Lignite Coal

Approximately half a million tons of coal were produced from the Blentfast lignite coal fields last year, and it is expected that a similar amount will be dug during the coming winter months.

The Peace River

Success Being Achieved In All Branches Of Agriculture

The eyes of agriculturists are now turning to the Peace River country, where the winters appear to be comparatively mild, and where wheat, oats and timothy seed can be grown and take prizes in world competition. In this wonderful stretch of country often by the middle of April the winter grains and grasses are green, and the first wheat in May sees the tulips and hyacinths in full bloom.

Summer temperatures range around 90, and though early frosts are at times experienced, harvesting is usually well in hand by the first week in September. Some splendid wheat yields were reported a year ago in the Grande Prairie and Valhalla districts running from 42 to 70 bushels to the acre.

The work done on the Beaveridge Experimental Sub-Station is fully set forth in the report of that station which is available for distribution and may be had on application to the Publications Branch, Department of Agriculture, Ottawa. The Peace River country is developing very rapidly, and the agriculture practiced is very diversified. Success is being achieved in all branches including grain, dairying, poultry and beekeeping.

Externally or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

British Harvesters And Red Cross

In War And Peace The Red Cross Is Still Serving

"Ready for service" is the proud boast of the Red Cross the world over, and in countless ways, unseen by the man in the street, the Red Cross is found to be "still serving."

A large party of British harvesters in the west found themselves stranded in the city of Calgary. Their immediate need was shelter for the night and the friendly hand. Cool weather and early frost necessitated the provision of warm bedding for these strangers within the gates.

The Red Cross of Alberta gladly came to the rescue and was able to co-operate with the Salvation Army in the problem of getting the men comfortable for the night, by supplying each and all with warm bedding.

Thus in the unknown byways of the world by little deeds of kindness these weary travellers reminded that the Red Cross, their friend in war time, was still anxious and ready to be their friend in times of peace.

People seldom improve when they have no model but themselves to copy after.

SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years put up only by The T. M. M. Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

OCTOBER 7

PAUL IN EPHEBUS

Golden Text: "We are His workmanship, created in Christ Jesus for good works, in order that God before prepared that we should walk in them."—Ephesians 2:10.

Lesson: Acts 19:1-41; Ephesians 4:20-32.

Devotional Reading: Ephesians 3:14-21.

Explanations And Comments

The Forfeited Chance, Acts 19:8. — On his third missionary journey Paul came to Ephesus, where he followed his customary method of speaking first to the Jews, and then to the Greeks. For three months in the synagogue he reasoned and persuaded as to the things concerning the Kingdom—the subject of Jesus' teaching. But instead of hearing his message, the Jews hardened their hearts, and some of them even spoke evil of "the Way" (used as a synonym for Christianity; recall Acts 9:2). Paul was obliged to break with the Jews, leaving the synagogue for the lecture-room of Tyrannus, where many of them followed him. Tyrannus was probably a Gentile who had a school of philosophy. Paul may have seemed to the Ephesians to be one of the wandering professors of philosophy who were so numerous in the early Empire. In the lecture-room of Tyrannus, from eleven to four, after that philosopher had finished his lesson, Paul proclaimed unto his hearers Jesus the Christ.

Two Fruitful Years, Acts 19:10. — For two years Paul continued teaching in the school of Tyrannus, and "all that dwell in Asia heard the word of the Lord, both Jews and Greeks." Within easy reach of Ephesus were the other cities of the Roman Province of Asia (on the western shore of Asia Minor). During these years were probably found the others of the Seven Churches of Asia of Revelation 1:11.

Many of the converts who had practised magical arts came and, publicly renouncing their deeds, brought their books and burned them in the sight of all. "These were books of formulae for compelling the assistance of spiritual beings, or securing the affections of a beloved, or for inflicting pain and spiritual torment."—A. S. Penke. The act destroyed property valued at fifty thousand drachmas, or the customary pay for fifty thousand days' labor. Probably there were few copies of the magical scrolls, and to their rarity was due their valuation.

Recipes For This Week

(By Betty Barclay)

ORANGE CUSTARD (Serves 7)

2 cups Borden's St. Charles Milk
1 cup hot water.
8 tablespoons cornstarch.
3 eggs.
¼ teaspoon salt.
¼ cupful cold water.
½ cup orange juice.
2 tablespoons lemon juice.
Grated rind of one orange.
1 cup sugar.

Mix cornstarch, sugar and salt, dilute with cold water. Add to scalded milk and hot water, stirring constantly until mixture thickens, afterwards occasionally; cook fifteen minutes. Add orange juice and slightly beaten eggs that have previously been mixed; mix thoroughly and lastly, add the lemon juice and orange rind. Cool and serve.

CARAMEL CUSTARD (Serves 6)

1 tall can Borden's St. Charles Milk with enough water to make 1 quart.
5 eggs.
½ teaspoon salt.
1 teaspoon vanilla.
½ cup sugar.

1 teaspoon nutmeg.

Gradually sift sugar into a hot skillet, shaking the skillet vigorously all the time to prevent burning. The sugar should melt about as fast as it is sifted into the pan. When it turns to an amber color (a light resin color) set on back of stove and add milk, being careful that milk does not bubble over, as is liable on account of the high temperature of sugar. As soon as the sugar is melted in the milk, add mixture gradually to eggs slightly beaten. Add the salt and flavoring to egg and milk mixture. Bake in custard cups in a moderate oven.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Will Continue Confederation Train

As a result of the great increase in winter travel between Ontario and the prairie provinces, the "Confederation," the Canadian National Railway, passenger and express which now runs between Toronto and Vancouver, linking these cities with Brandon, Regina, Saskatoon and Edmonton will operate as far west as Edmonton until January 5.

Each of the continents has one or more towns bearing the name of Rome.

Teeth and Health

THE TOOTH "NERVE"

You know, of course, that a tooth is not solid right through, but is hollowed out in the centre to form a chamber; and because of and experience perhaps in a dental chair, you have been made aware that a tooth does possess a "nerve."

But you gave no thought possibly as to whether this chamber contained other forms of tissue or not.

Now, as a matter of fact, it does, and the so-called "nerve" is known as the pulp, which tissue is a mass of almost gelatinous character containing minute blood vessels and nerve filaments.

So it is not just a glistering string like piece of nerve tissue as you may have supposed.

When the tooth erupts, the pulp chamber is proportionately large, but with the tooth practically fully formed, the need for tissue forming elements is largely over. So the blood supply is cut off more and more with a progressive narrowing of the pulp chamber, until in advanced life, it is sometimes altogether obliterated.

This accounts for the fact that tooth decay can move more quickly down the nerve in the child's tooth than in the adult's.

You dread the dental engine, and at the first touch of the "drill" to the pulp, you are sure the dentist has struck the nerve because of the pain produced.

However, this sensation is being carried merely by minute fibrils that lie in the dentinal structure, while the pulp containing the nerve proper has gone undamaged.

Remember this: that the power of healing in the pulp is very low and once injured, you are sure the recovery to health are extremely slight.

Which reason you should be on your guard to head off tooth disease in its earlier stages.

"What sort of face powder does your mother want, my girl?"

"Anyfink wot will cover up a black eye, sir."

The smallest race of people live on the Andaman Islands in the Bay to Bengal, near Burma. Their average height is less than four feet.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

—BY—
ALEX. PHILIP

Published by Special Arrangement
With Thomas Allen, Publisher,
Toronto, Ont.

CHAPTER II.—Continued.

The next day, dressed in light clothing and a pair of running shoes, Donald went around Stanley Park. Wishing to condition himself, he ran the greater part of the way.

Spring comes early in Vancouver as compared with the East. In January the buds are bursting in Stanley Park. The balmy sea air, scented with earthy odours from the deep woods, seemed to Donald to possess magic properties. The blood sang in his veins. Overhead, big white seagulls screamed and soared; squirrels raced in chattering flight as he retraced down the road, and over all was the sound of the booming surf. The wind rushed past his ears, and he shouted aloud from sheer exuberance of spirits and the joy of living.

Donald covered the distance from English Bay to Granville Street at a jogging trot. The air of the gymnasium seemed close after being in the open. The big Australian fighter was in the ring with one of his sparring partners. The slap of gloves was like music to Donald's ears.

"Just in time," welcomed Andy as he led him to the dressing-room, where he quickly shifted to fighting togs and then walked over to the ring.

A crowd of boxing-fans sat by the ring-side watching the big fellow work out. Donald's entrance caused a stir. His lithe, muscular body was the attraction of all eyes.

"Oy in," commanded Andy.

While an attendant was putting on his gloves, Donald studied the big man he was to help train. He would weigh at least two hundred pounds. His shoulders were enormously broad and square, and the muscles of his arms stood out in knobs and bunches. His face was a pasty colour, as though his training had been done inside. His jaw was square and strong, his eyes a mild blue, and his nose looked as though it had stopped many a solid punch. "Strong but slow," Donald decided.

When Andy introduced him Hagin merely grunted. To the fighter Donald was simply one more punching-bag.

Donald turned to Andy. "What do you want me to do?" he asked.

"Oh, knock the blighter out of the ring," rejoined Andy, with just a touch of sarcasm.

"Do you mean that?" queried Donald quickly.

Andy nodded.

Hagin came to the centre of the ring, assuming an awkward crouch, his arms wound about his face. Don-

ald circled him warily. The big man feinted with his right, Donald danced within range, and the Australian let loose a terrific right swing that would have felled an ox. Donald side-stepped, jabbed his left twice to his opponent's face, and his right missed Hagin's jaw by the fraction of an inch. A surprised look came over the big man's face. A murmur of applause from the audience.

"Strike me pink! What a left!" and "Strike me pink!" Hagin scowled and tried to bring the fighting to close quarters, but was easily avoided by his lighter opponent.

Donald now took the aggressive. His left found weak spots in the big man's defence, and repeatedly he sent in stinging jabs that drew his adversary's head back with a snap. Try as he might, Hagin could not get away from that whizzing left. It is a bitter pill to be bested by one's sparring partner. So far the Australian had been given a boxing lesson. He forced Donald into a corner and made for him savagely. Donald ducked under the full-line swings, and shot a left upper-cut to Hagin's jaw. The latter staggered weakly to the ropes. Donald was after him like a flash. Just then he saw Andy gestulating wildly and shaking his head. Hagin lunged forward and Donald fell into a clinch. The gong rang.

"What's the trouble, Andy?" asked Donald as he reached his corner.

"Strike me lucky!" whispered Andy hoarsely, "you're punchin' me meek-ticket. You're makin' a blinkin' boob out of me 'easyweight."

"You told me to knock him out of the ring," reminded Donald.

"Sure I did. But 'ow the 'ell did I know that you was a blinkin' cyclone? Strike me blind, a left 'and like I 'ave'n't seen since I 'anded Young Griffo."

"What shall I do in the next round?"

"Tyke a punch and go down—'urt your 'and—anything to quit. But for 'eaven's sake don't mess up my 'easyweight any more! If the public 'ears of this our big fight is all off!"

In the next round Donald dropped to the floor as they broke from a clinch in the centre of the ring. He rose to one knee, holding his hand and making a very face.

"Too bad," sympathized Andy as he ordered him to the dressing-room.

As Donald stepped from the ring he was intercepted by a curly-haired youth whose brown eyes sparkled with enthusiasm. "By golly, I want to know you. My name's Douglas Rennie. My, but that was a wonderful fist exhibition you gave us!" he ejaculated, gazing at Donald with undisguised admiration.

Donald flushed. "I appeared fast," he explained modestly, "as I was against a very slow opponent. I know nothing of Garrieau, but he won't have to be very clever to beat the Australian."

"Garrieau is fast and carries a knockout in either hand."

"I'm sorry for Andy's man if that is the case, as any kind of a left will beat Hagin. Come to the dressing-room," invited Donald.

A moment later Andy entered and sank dejectedly to a locker seat.

"You look rather blue, Andy," observed Donald.

"I am. All 'ell's a poppin'," admitted Andy.

"What's wrong?"

"I've lost me 'easyweight. 'E's quit."

"Why?"

"Said I framed on 'im by sending you in this afternoon. Said I 'urt is pride."

"Pride!" echoed Douglas sarcastically. "You're been treating him too good. I never thought much of him as a fighter. You're too good a trainer to be wasting your time on third-raters."

"Maybe you are right," conceded Andy, "but look what a blinkin' mess I'm in now! 'Ere I am in the 'ole three hundred bucks for training expenses, and I've put up a forfeit with

the promoters for appearance. I'll lose the 'ole lot." He threw out his arms with an air of resignation and sank back in his seat.

Little Andy presented a pitiful figure as he sat hunched in the corner—his jaunty manner gone; his blond head, usually held at a saucy angle, sunk on his chest. Gloom, deep, impenetrable gloom, enveloped this bright spirit from the Antipodes.

Donald knew now that for all Andy's munificent manner of yesterday, the three dollars to "eat on" and the sorely needed dinner he had bought, had come from a generous heart, but a depleted purse. Here was his benefactor in trouble. How could he help him? He crossed the room, sat down beside Andy, and placed his hand on the little man's arm.

"Andy, take me on. I'll fight Garrieau for you."

Andy came to his feet with a jump and seized Donald by the shoulders. "If you'll do that, me lad, I'll be your pal for life. Strike me pink, did you 'ear that? I've got a real fighter at last! 'Ooray!" The little fellow was in ecstasies. "We'll clean Garrieau up," he went on excitedly, "and then I'll tyke you to the Stytes, and then to Austrailia, and..."

"Hold on," interrupted Donald laughingly, "looks like you intend making a professional pug out of me. I'm doing this to help you, Andy, and I'm flushing in spite of myself, 'I'm broke."

Andy glanced over Donald's tall figure with a professional eye. "You 'ave a weeg to get fit, and 'as you 'avent 'ardly any weight to tyke off, you should be top 'ole in that time."

"May I work out with you?" asked Douglas eagerly.

"Glad to have you," replied Donald. A few minutes later the young men stepped to the street. Douglas seemed loth to go.

"Will you come to my home for dinner?" he invited.

Donald hesitated. It seemed ages since he had entered a private house. He glanced down at his only suit, which was rather seedy, then looked up, to find the usually roughish eyes of his companion fixed upon him seriously.

"Thanks, old man. I hope I may have the pleasure at some time, but I can't do it now," he said softly.

"You said you were broke," began Douglas, hesitatingly, "can—I—"

"No, no, I'll see you tomorrow," interrupted Donald, turning abruptly and walking swiftly down Granville Street.

Douglas stood watching him until he disappeared. "A mighty good sport," he said softly.

(To Be Continued.)

Farmers Rebel Against Soviets

Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisition of grain, is reported by persons arriving from the Ukraine, South Russia. Disaffection has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it! Some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

"RED ROSE TEA"

Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

RED ROSE TEA is put up only in Clean, Bright Aluminum Packages. The very best container for good quality tea.

Censored The Temperature

Chinese Newspapers Decreased Figures So People Would Work

The temperature was censored in Hankow recently. A hot spell caused a newspaper controversy over the heights attained by the mercury, and the charge was made that the figures were deliberately decreased.

Each day the weather apparently had been getting hotter, and each day the public scanned the temperature in the newspapers, only to find it just one or two points below 100.

A reporter was sent to investigate, and the Chinese authority informed him: "If we put the figure at more than 100 the public will think it is too hot and not work so hard."

This was duly published. The next day the aggrieved authority refused to give out any figures on temperature or water market, and for a day the public had to depend upon their home thermometers. However, an outcry in the public press forced the "censorship" to be suspended after one day.

Good Roads Necessary

One Thing Country Cannot Afford To Do Without

The world is now moving on wheels and a province that does not provide the facilities for allowing the wheels to turn will be left far behind in the march of progress. The roads that will have to be built in Western Canada to keep these provinces anywhere in line with the states to the south will cost a great amount of money. The point is, however, that while you may afford to do without some things good roads are not one of them. The money spent on roads, if expended wisely, will earn dividends. Good roads that will permit free flow of traffic in all kinds of weather are as essential to the business of the modern community as telephones, telegraphs and railways.

Rather A Hard Job

An Irish county council were in discussion over the provision of a new bridge in place of an old one. These extraordinary propositions were submitted at the meeting by one of the members:

(1) That the old bridge be removed and a new one built in its place.

(2) That the materials of the old one be used in the construction of the new bridge.

(3) That the old bridge be left standing until the new one is completed.

A Generous Gift

London.—An anonymous contributor, believed to be an American, has given the British treasury \$15,000 in United States Steel five per cent. bonds, to help payment of interest on the British debt to the United States. Winston Churchill, chairman of the exchequer, expressed appreciation of "the spirit which inspired this gift."

"How's your wife coming along with her driving?"

"She took a turn for the worse last week."

Lake Baikal, in Siberia, is 4,500 feet deep.

Little Helps For This Week

"Lord, teach us to pray."—Luke xi. 1.

O Thou by whom we come to God,—The life, the truth, the way! The path of prayer Thyself hath trod; Lord, teach us how to pray.

—James Montgomery.

Wherever there is religion there is prayer, and wherever there is a religious soul there is heard the language of prayer.

—Francis B. Hornbrook.

These musta unverbally pray. Prayer mayna bring money, but it brings us what no money can buy—a power to keep from sin, and to be content with God's will, whatever He may please to send.—George Eliot.

Exercise

You need a cool and soothing rub down with MINARD'S Liniment after any form of exercise.

EVEREADY Radio Batteries

—they last longer

Use Eveready Layerbilt "B" Batteries for Economy

Here is positively the lowest-priced, satisfactory, longest-lasting "B" power you can buy.

Eveready Layerbilt batteries completely meet the "B" power requirements of every radio receiver. Three sizes—large, 45-volt; medium, 45-volt; small, 22½-volt. All Eveready Layerbilt quality at new low prices.

Equip your radio set with Layerbilt batteries and enjoy many months of carefree, better reception.

How to Make Rice Pudding

A TESTED RECIPE

That Adds New Flavour!

4 cups rice 2½ cups Borden's 1-3 cup sugar 2½ cups milk 1½ cups water 1½ cups salt 1½ cups water

Wash the rice thoroughly, then add with the sugar and salt to the milk diluted with water. Pour into a buttered baking dish and add a sprinkling of nutmeg. Set the dish in pan of hot water and bake three hours at 300°F. Stirring several times the first hour to prevent the rice from settling to the bottom. Serve hot or cold.

Here and There

(144)
An effort is being made to establish an airport at Baffin, Alberta. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

A further supply of airplanes and airplane parts arrived in Montreal recently when the Canadian Pacific freighter "Beaverford" brought two De Havilland Moth planes, one case of wings and two cases of engine parts.

A call for tenders for a large elevator with a capacity of 1,500,000 bushels has been sent out by the Saint John Harbor Commission. The new structure is to be erected on the Colwell Fuel Company's site, in West Saint John, the work of construction to be set under way as soon as possible.

A Cadillac sedan equipped with rubber insulated steel flanged wheels has been specially equipped by the Angus Shops of the Canadian Pacific Railway at Montreal for the use of the engineering department of that company on inspection trips. The machine has an extra braking system operated by the steering wheel and can make as great a speed on the rails as it can on the highway. Over seventy miles an hour was made on a trial run.

A big black bear tried to stop a Canadian Pacific freight train the other day near Aradale station in Northern Frontenac county in Ontario, and when the encounter was over there was not enough of the bear left to make a pair of mitts. Brute evidently wandered on to the tracks during the night and was blinded by the glare of the headlights. Black bear are found throughout Eastern Canada but are not often seen, except during the berry season, as they are night prowlers.

Composing Room Divulges Secrets

The cut above was reproduced from a collection of photographs plus a little art work, and it came about this way. There was a need for an illustration to brighten and balance the page. So we looked through the files. The photograph of the new Canadian Pacific engine came to light, first, but, while it illustrates the largest passenger engine in the British Empire, our readers already knew all about it. Put it on one side! Then we saw the picture of the ox which is engaged in shunting freight cars at Trieste. This we thought we could tie up to the engine in some way, but when we saw the photograph of the elephant at Kandy, we thought that it would be much better and easier to write a feature on, say, "power" or "World transport!" The African Zulu with the Ricksha would have helped a story of this nature, but when we saw the beautiful curves of the Lanchwa Pagoda and the graceful lines of the Bloch Ark in the garden of the Jade Tree Studio at Shanghai we thought that perhaps we could make an appeal of sorts to the cultural side of our readers. But the office boy was very keen on the locomotives, the work-a-day man thought he could design a better lay-out with just the animals, and our hair-haired stenographer considered the architecture more artistic.

We compromised by deciding to make a three-column instead of a two-column lay-out and using them all. What then remained was to tie them up in some way, so we got out our best-looking photograph of the "Empress of France," and—there you have a complete short story. One gets aboard a Canadian Pacific train first and at New York boards a Canadian Pacific steamship for the ports and nights of the world. The "Empress of France" doesn't really belong to the set, because this year she will not make a cruise, but, here she is last year at Rio de Janeiro. The "Empress" is replaced in cruise service by a "Duchess". Not that this makes a great deal of difference to your editor, but there are many readers of this page too, who will spend Christmas in the Holy Land, and observe blossom time in Japan. They will tour the West Indies in comfort in January or February. They will spend the winter in luxury travelling round South America and South Africa, round the world or round the Mediterranean. They have shown us their booklets, and before Spring is here again they will be showing us their tan and their souvenirs.

FARM FOR SALE

The Soldier Settlement Board of Canada offers for sale by public tender—

The North East Quarter of Section Thirty-two (32), in Township Twenty-nine (29), Range Eleven (11) West of the Fourth Meridian, containing 159 acres, more or less, reserving all mines and minerals.

Terms of sale are not less than 20 per cent of the purchase price in cash on acceptance of the tender, and the balance in 8 equal instalments, with interest at 6 per cent per annum on amortization plan.

Each tender must be accompanied by an accepted cheque for \$100. If tender is accepted, this sum will be credited to the purchase price of the land. If tender is not accepted the money will be returned to the tenderer.

Tenders will be opened at CALGARY, Alberta, on MONDAY, October 8th, 1928.

The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive offers until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of the N.E. 1/4 32-29-11-W. 4th Meridian".

Address tenders and enquiries to—
